# REFRIGERANT

## Prepare for the Phaseout\*

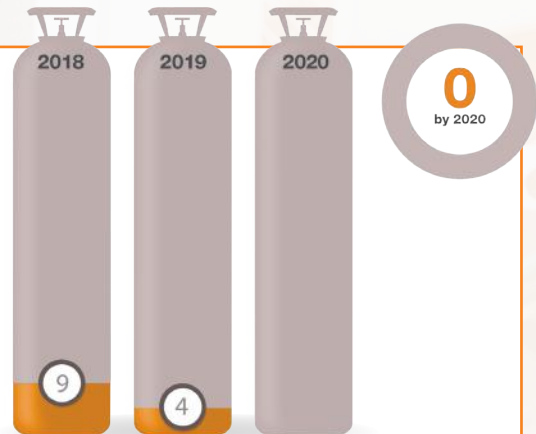

### Why the Phaseout?

Hydrochlorofluorocarbons (HCFCs) are ozone-depleting compounds used extensively in refrigeration and air conditioning equipment manufactured and installed today. The most common HCFC refrigerant is R-22. In response to these environmental concerns, no new or imported R-22 will be allowed in the U.S. on or after Jan. 1, 2020.

### What to Know

- 2018 will continue to bring significant changes to refrigerant
- Per the phaseout schedule, production and importation of HCFC-22 will be reduced to:
  - 9 million pounds in 2018
  - 4 million pounds in 2019

**We are here to help you stay informed of current EPA requirements!**

505189

505190

### R-410A REFRIGERANT

- 25 lbs. • Must have EPA certification

ITEM NO.

**505189 CALL FOR PRICING**

### R-22 REFRIGERANT

- 30 lbs. • Must have EPA certification

ITEM NO.

**505190 CALL FOR PRICING**

While you're not legally required to stop using R-22, you can update/replace your existing system with one that uses safer refrigerant or stock up on R-22 while it's still available.

### New Fan Energy Rating Regulation

The Department of Energy (DOE) introduced new efficiency standards for fans on forced-air furnaces, which will take effect on July 3, 2019. At that time, residential furnace fans must meet specific fan energy ratings set by DOE for the specific type of furnace. This new standard will reduce the energy consumption of furnace fans by about 40% and save your customers money on their energy bills.

\*Only resellers or EPA-certified technicians can purchase these products. You must provide proof of certification prior to ordering these refrigerant cylinders.

# HVAC SERVICE & INSTALLATION PARTS

Barnett offers a quality lineup of key HVAC service and installation parts to get you prepared for the busy HVAC season. Avoid an HVAC disaster by keeping these key HVAC service parts on your truck.

## LIQUID LINE FILTER DRIER

• Copper fittings • Type: Sweat

ITEM NO.	DESC.	SIZE	SYSTEM CAPACITY (TONS)	PRICE
523631	13.5 CU. IN.	3/8"	UP TO 5	<b>\$9.09</b>

### MULTI-ZONE

## WHY MINI-SPLITS?

- 1. Quiet:** At under 19 decibels, mini-splits are quiet enough that customers may forget their unit is running.
- 2. Energy-Efficient:** Inverter-driven condensers and heat exchangers allow precise, calculated amounts of heating or cooling. Your customers will minimize their energy costs, saving up to 30% on energy bills compared to other forms of cooling and heating.
- 3. Superior Comfort:** A mini-split delivers continuous heating or cooling, eliminating temperature variation and keeping your customers comfortable at all times.

### 20 SEER DUCTLESS MINI-SPLIT AIR CONDITIONERS

# WALL AIR CONDITIONERS

**Garrison**

## PREPARE FOR HEAT AND HUMIDITY

Garrison through-the-wall air conditioners create a permanent, tight seal between the unit and the surrounding wall to help contain cold air and prevent warm air from leaking in year-round!

Even if your customers already have a traditional central equipment system, Garrison through-the-wall air conditioners can help deliver cold air in the most enjoyed spaces throughout households.

**Garrison**

Barnett stocks R6.0 & R8.0 insulated flexible duct. Stock up today.

## INSULATED FLEXIBLE DUCT, 25 FT. LENGTH

- This is a UL-, ETL-listed product
- Flexible ducts can speed installation by reducing the number of joints in a run and eliminating the need for elbows and offsets
- Easily conform to oval as well as round connectors
- Galvanized core wire
- Insulated duct features a maximum temperature rating of 200° F
- Always install per instructions and seal using approved mastic or sealant (or approved tape)
